Robert Collyer's) was completely filled last night by an audience that had assembled to hear the opera of "Patiense" performed by an amateur company made up almost entirely from the choir and the congregation of the church. The entertainment was given for the benefit of the Sunday-school library and will be repeated to-night. A temporary stage was arranged at one end of the room and upon it was set a pretty woedland scene. There were footlights and other stage arrangements. The orchestra was a grand piano and the accompanists were A. E. Greenhalch, lorganist of the church, and F.T. Southwick. W. W. Thomas was the musical director and George S. Sturges stage manager. G. W. Ryle acted as Banthorna, and the part of Growenor was taken by George S. Sturgis. The performance passed off pleasantly. Several of the actors were recalled. Between the acts S. A. L. Bentley, the English humorous singer, amused the audience by singing several whimsical ditties that were much applauded.

cover any element of a disturbing character, except, perhaps, over-production by manufacturers, presure to sell goods, tendency to extend credits unduly, and the dangers that result to individuals owing more than they can readily pay. It is not too late to reform this single sinister feature in the fair prospect which greets the whole community at the opening of the new year. Merchants, bankers and manufacturers have it within their power to limit, and bring within safe bounds, these sole existing elements of danger. The figures which we present will have performed good service if they beget a thoughtful consideration of the fact that a constant increase in the number of failures through the unwise expansion of credits will undo the good results which ought to follow from the legitimate trade, based on legitimate business principles, which is possible in a country so prosperous as this."
